

STEAM PRODUCT AND SYSTEM TRAINING

Learn about steam systems and how to improve efficiency and performance.

This session is designed for end users looking to better understand steam systems and their underlying products.

Attendees will learn:

- steam basics and steam system operation
- using products to solve problems
- important characteristics of Watson McDaniel products

The factory-based presenters bring decades of experience to this session. Attendance is limited to ensure time to answer your questions.

Fulton and Watson McDaniel are leaders in the manufacture of steam boilers and specialty equipment. Their expertise is invaluable to facilities professionals working to optimize steam operations.

TOPICS TO BE COVERED

Boiler Basics

Steam Basics

- Heat Transfer and BTU's of Latent Heat
- Pressure vs. Volume
- Velocity & Noise

Products for Protecting Systems

- Drip Steam Traps
- Y-Strainers
- Separators
- Relief Valves

Products for Efficient Steam Usage

- Process Steam Traps
- Pressure & Temperature Regulators
- Control Valves
- Pressure Motive Pumps

Plus, discussion of other Pipeline Accessories and problem-solving products such as Check Valves, Air Vents, Vacuum Breakers, and Pump-Traps!

RESERVE YOUR SEAT - SPACE IS LIMITED

What's included:

- Reference Materials
- Lunch
- Raffle Prizes!

Select your preferred date and location.

October 4th 8:00 - 4:00 - Stockton

October 5th 8:00 - 4:00 - Hayward

October 12th 8:00 - 4:00 - Fresno

Venue and parking details will be provided once you confirm attendance. Cost \$100 per attendee.
